## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-34, drawn to a method of treating cancer and cachexia in a mammal using urine isolate, classified in class 424, subclass 520.
  - II. Claims 35-69, drawn to a method of treating cancer and cachexia in a mammal using antigen presenting cells (APCs), classified in class 424, subclass 93.1.

2. The inventions are distinct, each from the other because of the following reasons:

The methods of Groups I and II relate to methods but each method differs in method steps, modes of operation, reagents needed and serve different endpoints and effects.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, divergent subject matter, and require different search strategies, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the response to this requirement, to be complete, must include an election of the invention to be examined even though the requirement be traversed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Natalie A. Davis whose telephone number is 703-308-6410. The examiner can normally be reached on M-F 8-5:30 (every other Friday off).
